EDUCATION

University of California, Berkeley

Expected May 2027

B.S. in Electrical Engineering and Computer Sciences, Minor in Data Science

Relevant Coursework: Computer Architecture & Machine Structures, Data Structures & Algorithms, Structure & Interpretation of Computer Programs, Foundations of Data Science, Web Design, Circuits & Devices, Designing Information Devices & Systems, Principles of Business, Discrete Mathematics & Probability Theory

SKILLS

Languages: Java, Python, HTML, CSS, C, Javascript, SQL

Tools & Frameworks: Figma, R Studio, Matplotlib, Bootstrap

EXPERIENCE

Contract Project Manager, Alaska Airlines

February 2025 - Present

- Conducting comparative analysis of maintenance control software to identify efficiency gaps for ~330 aircrafts
- Assessing communication systems (satcom, ACARS) through in-depth interviews to reduce operational delays

Research Intern, Zhejiang University

June - August 2024

- Researched the cross-cultural interpretations of emotions in heterogenous and homogenous cultural groups
- Wrote a [technical poster](#) and presented research findings at GRIPS closing ceremony to 100+ researchers

Design Apprentice, IBM Accelerate

June - August 2024

- Applied UX design skills and UX research methods to sample design briefs using Mural
- Engaged in weekly discussions and collaborated with team members to develop journey mapping skills

Contract Consultant, Abolos

February - May 2024

- Drove projected ~50% revenue growth via market and competitor analysis using 4P & 3Cs framework
- Delivered actionable growth strategies (e.g. diversification, customer acquisition, market development)

Student Researcher, Data Science Discovery Program

February - May 2024

- Performed data annotation on 20+ news articles for misinformation to support a developing research paper
- Awarded Best In Show out of 50+ submissions at the UC Berkeley Data Discovery Symposium

Research Assistant, Institute for Research on Labor & Employment

October 2023 - May 2024

- Assisted UC Berkeley Sociology Ph.D. candidate with two projects focusing on Informational Trust in Multimodal Large Language Models and Human & Artificial Intelligence Interactions
- Conducted literature reviews on 25+ publications to analyze research methodologies of how different artificial intelligence modalities foster relationships with humans

LEADERSHIP & PROJECTS

External Vice President, Core Consulting Group

December 2024 - Present

- Organizing a one day diversity in consulting & finance conference reaching an audience of 100+ students
- Increased outreach initiatives by ~ 45% through boosting professional development opportunities

Society & Alumni Relations Officer, Society of Women Engineers

December 2024 - Present

- Implemented initiative bridging three engineering communities of over 100+ through a pen pal program
- Hosted monthly events connecting 40+ undergraduates to professional and collegiate communities

Tech Committee Lead, Women in Network

November 2024 - Present

- Facilitate tech mentorship pairings for 45+ undergraduate and post-undergraduate participants
- Led 5+ professional development events for undergraduate students reaching 200+ females nationwide

Personal Website irisli1.github.io

- Created a personal website using HTML/CSS & Javascript displaying my work gaining 100+ views per month
